Product: MDSyncnet.com

This web-based service streamlines the physician on-call scheduling process and provides hospital management with simple and efficient tools to communicate physician documents and agendas.

HAVE YOUR HOSPITAL'S MEDICAL STAFF OFFICE ONLINE.

You can. MDSyncnet enables your paper-based Medical Staff Office to be online with information available 24 hours a day, 7 days a week for your medical staff & support teams.

MDSyncnet's On-Call module facilitates scheduling procedures. Here's how:

- No usernames and passwords to memorize. Users simply click the provided link and access is immediate.
- Schedules are coordinated online, reducing the number of phone calls, faxes, mailers.
- Labor efficiency is maximized, as less time is devoted to routine tasks.
- An unlimited number of call and committee groups can be created and scheduled. No Additional Cost!
- System audits ensure hospital administrators know who is making changes to the on-call schedules and when they were made. History of transactions is always available.
- Secure: User privileges are enforced by trusted online connections to the site using Network Solutions SSL certificates. Also, your information is backed up to an offsite Network Operations Center multiple times per week.

From a current member:

I would like to express my complete satisfaction with MDSyncnet's online On-Call scheduling system. We formerly created, printed and distributed monthly On-Call rosters manually. The possibility for error was great and an error in calling the wrong practitioner and/or using an incorrect number was even greater. Now that we use the On-Call system we have virtually eliminated calling errors and our staff has eliminated the use of outdated printed lists. On the medical staff services side, the system makes it easy to make call switches, note vacations and time away, and change practitioner contact information – this information has only to be entered once! Best of all, MDSyncnet is accessible from work or home.

Brad and his team are excellent to work with and very responsive. He helped us customize some of the features to better meet our needs. Bottom line, the monthly fee for the On-Call system more than pays for itself in the time it saves the medical staff office entering and proofreading names, contact information and call changes. Thanks to MDSyncnet, we have eliminated the chance of a 1 a.m. phone call to the wrong practitioner!

Janice A. Krehel, BA, CPCS, CPMSM
Director Medical Staff Services
Central Peninsula Hospital
Soldotna, Alaska

Additional Modules include:

- **Directories:** The days of searching through paper directories to find the contact information you're looking for are in the past. This customizable module allows for the posting of key contact information for all authorized users to view anytime day or night.
- **Medical Staff Office:** Reduce the paper shuffle. Post bylaws, policies and procedures and other important documents online.
- **Broadcast:** Instant messaging immediately notifies staff with new or updated hospital, call group and/or committee information.
- **Committees:** Coordination of meeting times & distribution of minutes is simplified. Cancellations can quickly be rescheduled.
- **Resources:** Post links to the latest advances in patient treatment as well as hospital policies and procedures.
- **Polling:** "In recent years, physicians are looking for the ability to become more involved in hospitals planning and decision-making. They want a seat at the table where decisions are made, and an ongoing, effective means of communication with administrators." by Press Ganey and Assoc., [Physician Partnership: Creating Powerful Relationships](#)
